Communities on reddit, specifically, have a top-down system. The top moderator (by seniority) has near complete control. I do tend to use personal values to grow and shape communities when I am the top moderator, especially when I created the community. Otherwise, I act more as an agent of the community. Additionally, all communities on reddit are required to adhere to the Content Policy or risk being removed from the site. Those are just baseline rules, though.

Probably spam, this is something that happens on all my subreddits. There are two major types of spammers that I come across. Ones where they are still building up karma to spam later or otherwise astroturf, and ones that have already been activated and spam sketchy t-shirt sites that steal your credit card info or whatever else.

10 Within the forums you moderate, what topics require the most frequent intervention (if possible please give both the broad topic and the specific debate)?
Anything that is political and even mildly controversial. Those topics tend to devolve into personal attacks really quickly.

• A member of a community, responsible for preserving community values.
• An independent moderator, guided by personal values

As a Reddit moderator, I am definitely not an employee or an agent of an organisation. I selected both independent moderator and member of the community. It varies by subreddit, but I'm not an active member of all of them, simply enforcing the rules instead. As for being guided by personal values, there are always more subjective rules that moderators might enforce differently.

11.a	If you selected Other, please specify:	
11.b	If you selected more than one answer above, please explain why.	We are members of the community, but in our role as moderators of a very large subreddit (/r/science), we are also actively working to prevent the subreddit from filling with low effort content like jokes and memes, which is the default direction for subreddits, and is arguable acting against the broader community desire in order to maintain a high quality science discussion
