Secondary Impact

To represent the further impact of the experience, I visualised how each persona would use their emotional connection to nature in their adulthood and how they would create a global environmental impact.

Sally McLeod
Age: 34

Occupation:
Renewable Energy Engineer

Through Symbiotic Realities Sally was inspired to work within the natural environment that could help humanity in a more sustainable way.

Liam Jameson
Age: 35

Occupation:
Biomimicry Scientist

Liam further explored AI technology and now uses it to disocver about the shape and form of nature and how humanity can learn and develop from it.

Lucy Scott
Age: 36

Occupation:
Environmental Advisor

Lucy was motivated by Symbiotic Realities to spread climate change awareness and now teaches communities how to grow their own food.

Pixel Algorithm
Age: 38

Occupation:
Climatology Teacher (Metaverse)

Pixel further circulated the message from Symbiotic Realities and became an online teacher, educating the next generation about the environment.

Symbiotic Realities future impact on all users creates a balanced relationship between human and nature creating a positive change on the environments health.
