

Robert Calderwood LLB CBIM
Chief Executive
Strathclyde House, 20 India Street, Charing Cross, Glasgow G2 4PF

Dear

WEST OF SCOTLAND TWENTY - 07 STUDY - HEALTH IN THE COMMUNITY

The Medical Research Council based at Glasgow University is conducting an important study of health and related issues in certain age groups of the population in Glasgow and the surrounding area. The study is described in more detail in the enclosed leaflet, which explains how the results can be used to plan future medical and social services.

Strathclyde Regional Council is supporting this study and, from the information your household very kindly provided to us in the annual Voluntary Population Survey, we believe that you may fall into one of the age groups of particular interest. Over the next few weeks interviewers representing Strathclyde Regional Council will be visiting those who have been selected to invite them to take part in this study.

If you are interested in taking part and would like to help, you can save us a call by completing the reply slip at the foot of this letter and by returning it to me in confidence in the pre-paid envelope provided.

I can assure you that your name will not be passed to any other organisation and no individuals will be identified in results published from the research.

Should you wish any further information about the study, please phone Mr A Mackay on 041-227 3606 or ask our representative when he or she calls.

Thank you for your co-operation.

Yours faithfully

Depute Chief Executive
(Strategic Issues)

I would like to take part in the "Twenty - 07" health study and I agree to my name being given to the Medical Research Council for this purpose only.
